

Division of Oral Medicine and Pathology Department of Human Biology and Pathophysiology

Outline

The specialty of oral medicine and pathology is concerned with diagnosis and study of the causes and effects of diseases affecting the oral and maxillofacial region. We perform pathological diagnosis of the surgical specimens obtained from oral and maxillofacial regions. We see the patients mainly suffering from oral psychosomatic disorders such as burning mouth syndrome, atypical odontalgia and dry mouth at the “Oral Medicine Consultation Clinic” in our hospital. Our research interests are shown below.

Faculty members

Professor; Yoshihiro ABIKO, B.A.,C.P.P., D.D.S., Ph.D.

Senior assistant professor ; Jun SATO, D.D.S., Ph.D., Koki YOSHIDA, D.D.S., Ph.D.

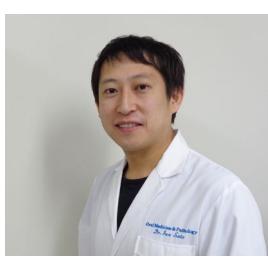

Assistant professor ; Tetsuro Morikawa, D.D.S., Ph.D.

Hospital assistant professor; Masafumi Utsunomiya, D.D.S., Ph.D.

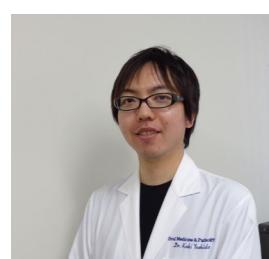

Graduate (Ph.D.) student ; Dedy ARIWANSA

Yoshihiro ABIKO

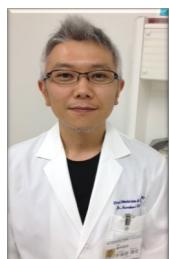

Jun SATO

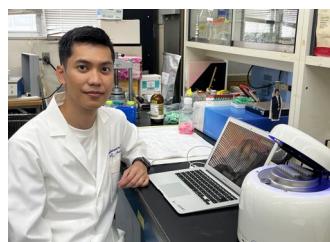

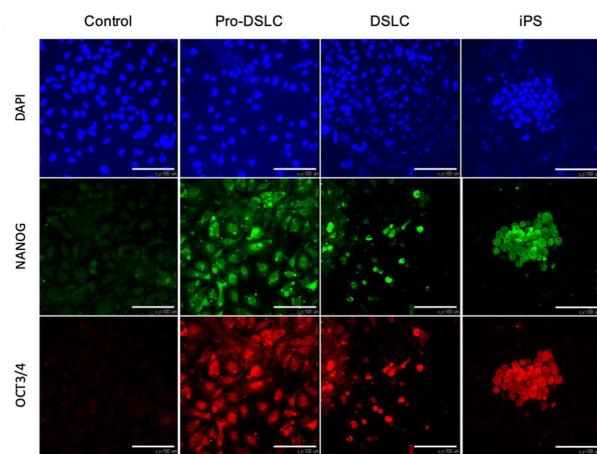

Koki YOSHIDA

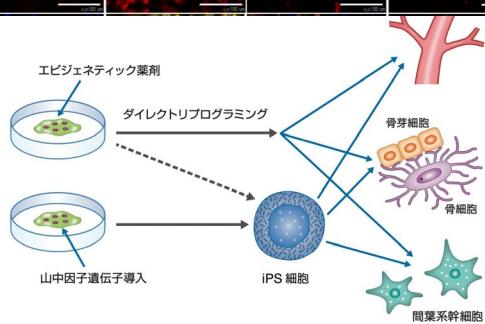

Tetsuro MORIKAWA

Masafumi UTSUNOMIYA

Dedy ARIWANSA

Dr. Durga Paudel, on the left, earned a PhD here, became an assistant professor at the Advanced Research Institute, and then moved to the United States.

We used epigenetic techniques to reprogram Malassez epithelial cells into iPS-like cells and then differentiated them into vascular and bone cells.

(Yoshida K et al, Scientific Reports 2021) .
