

## Department of Developmental Pharmaceutical Education

Faculty members

Specially Appointed Professor: Ken Iseki, Ph.D.

Specially Appointed Professor: Kumiko Kasashi, Ph.D.

Outline

The university prepares a curriculum that provides knowledge and information for using “chemical substances” as medicines and experiences through practical training in pharmacies and hospitals. Pharmacists can work with their professional ability not only in the medical field but also in various field. For instance, pharmacists can make use of their knowledge and experiences for an appropriate medication in the sport, if pharmacists have a chance to know that “chemical substances” are categorized as doping prohibited substances. We have plan to educate students from various aspects as clinical field, sport area or community health care in order to respect people’s body and health.

### 【Education Field 】

Pharmaceutical care

Sport Pharmacy

Clinical nutrition

### 【Research Field 】

Sport and appropriate medication

Anti-Doping Education
