

[Keywords] Oral infectious disease, Oral biofilm, Anaerobic culture, Identification methods, PCR.

[Academics] Futoshi Nakazawa, Hiroshi Miyakawa

[Course aims]

It is known that many bacteria belonging to the oral flora cause infectious diseases, such as dental caries and periodontal disease, by forming oral biofilms. Bacteria that form oral biofilms are either facultative or obligate anaerobes, and their culturing may be difficult in some cases. Therefore, to study the flora of oral biofilms, we have to learn culturing methods for anaerobic bacterial species and genetic identification methods such as polymerase chain reaction (PCR). Furthermore, it is important to understand the relationship between bacterial species of the oral flora and oral infectious diseases.

In this course, students will learn the characteristics of the oral microflora, bacterial virulence, taxonomy of bacteria, and identification techniques.

[Course objectives]

The goals of this course are for the student to be able to:

- (1) Explain the role of oral biofilms in infectious diseases
- (2) Analyze microflora using culturing methods
- (3) Explain the principles of biochemical identification methods
- (4) Explain the methods for quantification and identification of bacterial species using PCR

[Course content]

Class	Theme	Content	Academics
1	The role of biofilms in infectious diseases		Futoshi Nakazawa Hiroshi Miyakawa
2	Forming and analyzing experimental biofilms		Futoshi Nakazawa Hiroshi Miyakawa
3	Anaerobic cultivation method for identification of bacteria from oral biofilms		Futoshi Nakazawa Hiroshi Miyakawa
4	Identification of bacterial species based on their biological properties		Futoshi Nakazawa Hiroshi Miyakawa
5	Identification of bacteria using PCR "		Futoshi Nakazawa Hiroshi Miyakawa

[Grading policies]

The overall grade in the class will be decided based on class attendance and reports.

[Remarks]

Textbook: Inform students which textbook will be used

Reference book: Same as above

[Preparation for course]

Students must understand the course objectives and must adequately prepare for the classes.
