

Department of Adult Health Nursing

Outline

In our department, we understand the physical, psychological, and social relationships of adult patients and families from the viewpoint of consumers focused on self-care, and we are conducting education and research nursing practice for people with chronic illness and for people who follow the recovery process from the acute phase.

Our division has been performing research on the topics listed below.

Faculty Members

Professor: Yoshiko Sasaki, Ph.D.

Assistant Professors: Fusa Karatsu, M.S.N.

Kaori Kumagai, M.S.N.

Naoki Kanda, M.S.N., CNS

Research Associates: Yuki Takagi, M.S.N.

Kanako Ito, M.S.N.

Keita Takahashi, B.S.N.

Mako Maekawa, M.S.N.

Hiromi Shimizu, M.S.N.

Main Research in Progress

Implementation and evaluation of support programs for patients and families with neurological illness

Compromise with diseases of chronically ill patients

Development of family intervention support program for cancer patients

The actual state and related factors of social exclusion in cancer survivors

The effect of exchanges of cancer patients and families on the Internet
