

Division of Orthodontics and Dentofacial Orthopedics

Department of Oral Growth and Development

Outline

The specialty of orthodontics is concerned with the study and treatment of malocclusions, which may be a result of tooth irregularity, disproportionate jaw relationships and orofacial malfunctions. Orthodontic treatment focuses not only on dental and occlusal problems, but also deals with the control and modification of maxillofacial growth and morphology. High-quality outcomes of orthodontic treatment can only be accomplished with comprehensive knowledge about growth and development of maxillofacial region, occlusion, materials sciences, and diagnostics and therapeutics of malocclusion. Our research interests were shown below.

Faculty members

Professor: Masahiro IIJIMA, D.D.S., Ph.D.

Assistant professor/full-time lecturer: Takeshi MUGURUMA, D.D.S., Ph.D., Miki OKAYAMA, D.D.S., Ph.D.

Assistant professor/research associate:

Atsue YAMAZAKI, D.D.S., Ph.D., Yuya NAKAO, D.D.S., Ph.D., Naohiko KAWAMURA, D.D.S., Ph.D.

Clinical instructor:

Yuki TOMITA, D.D.S., Ph.D., Rina ISHIKAWA, D.D.S., Ph.D., Ryusuke YAMADA, D.D.S., Ph.D.

Masahiro IIJIMA

Takeshi MUGURUMA

Miki OKAYAMA

Atsue YAMAZAKI

Yuya NAKAO

Naohiko KAWAMURA

Yuki TOMITA

Ryusuke YAMADA

Rina ISHIKAWA

Postgraduate students

Yumiko ENAMI-TANAKA, D.D.S., Ryota NAGASAKI, D.D.S., Dai TSUCHIDA, D.D.S.

Zuñiga Heredia ENRIQUE EZRA, D.D.S., Kana EGAMI, D.D.S., Yuri SEKI, D.D.S.

Jin TSUCHIDA, D.D.S., Yuko MATSUKI, D.D.S. Shotaro YAMAZAKI, D.D.S.

Yumiko ENAMI-TANAKA

Ryota NAGASAKI

Dai TSUCHIDA

Zuñiga Heredia
Enrique Ezra

Kana EGAMI

Yuri SEKI

Jin TSUCHIDA

Yuko MATSUKI

Shotaro YAMAZAKI

Main research in progress

- 1) Extracellular matrix in the temporomandibular joint (TMJ)
- 2) Orthodontic materials research
- 3) Three dimensional (3D) analysis of orthodontic tooth movement
- 4) Development of 3D bioprinting scaffold for bone replacement in craniofacial region
- 5) Development of bioabsorbable magnesium alloys for bone fixation plates and orthodontic mini-implants
- 6) Signaling by mechanical strain in human periodontal ligament cells in vitro
